

Boveda® FRESH BAG

Bulk Storage Designed to Save The Terps

PROTECT YOUR BOTTOM LINE

All-New Boveda Fresh Bag! The High-Barrier, Multi-Layer Bag with 2-Way Humidity Control from The Original Terpene Shield™.

Keeps your flower fresh while saving your expertly cultivated terpenes! Creates a stable environment that's critical to cannabis storage with Boveda active and accurate 2-way humidity control. Preserves up to 1 pound of cannabis.

FULLY INTEGRATED PROTECTION

The Boveda Fresh Bag preserves the quality of the cannabis inside thanks to the precise patented technology in The Original Terpene Shield. An all-natural, saturated salt solution keeps the relative humidity (RH) at an optimal 55%-65% RH. This ideal environment prevents trichome damage, terpene loss, over drying and mold. Protect your bottom line, and maintain valuable water weight with the Boveda Fresh Bag.

EFFICIENCY AND OPTIMIZATION

The Boveda Fresh Bag is the first and only bulk storage bag in the industry that can actively maintain the optimal humidity level for flower storage. Superior, high-barrier materials control water vapor transfer, keeping cannabis flower fresher, longer. A 62% RH Size 67 Boveda pack included in every bag seals the deal by seamlessly achieving and maintaining the ideal conditions for cannabis storage.

KEEP CANNABIS FRESH AND MAINTAIN YOUR REPUTATION WITH THE BOVEDA FRESH BAG

Boveda® FRESH BAG

Bulk Storage Designed to Save The Terps

FEATURES & BENEFITS

PRECISION

- Protects your bottom line by maintaining ideal conditions for cannabis storage*

CONVENIENCE

- High-quality, resealable zipper closure
- Includes one 62% RH Size 67 Boveda 2-way humidity control pack

SPECIFICATIONS

- Premium, multi-layer, 4.5 mil with UV protection
- 16" x 16" size with an 8" bottom gusset for easy warehouse storage
- Both English and Spanish instructions
- 13½" by 4¾" area for handwriting or stickering
- Available in 5-pack and 50-pack

Water Activity - Dry Challenge Environment

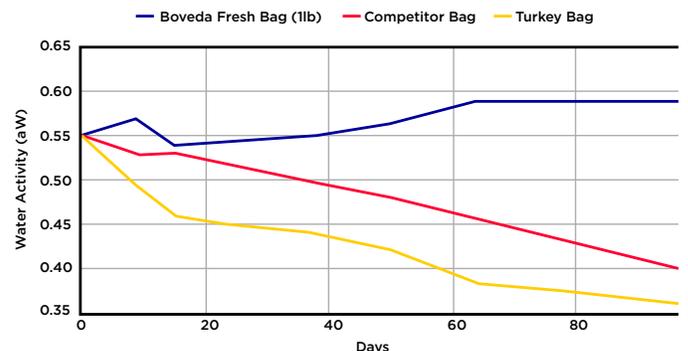

Figure 1 - Water Activity (aW) over time (0 to 97 days)

*Cannabis stored in a Boveda Fresh Bag reached and maintained the appropriate RH to preserve the protective monolayer around trichomes. Within one week, cannabis stored in competitor bags fell outside this monolayer range.

INSTRUCTIONS FOR USE

1. Take out Boveda pack from inside the Fresh Bag, remove and discard the clear overwrap, and return Boveda to Fresh Bag.
2. Place up to 1 pound (500 grams) of cannabis inside.
3. Close the bag and store in a dry, cool place and out of direct sunlight.
